A
Condition-associated Hallmark programs
Interferon gamma response
MYC targets V1
Interferon alpha response
IL2-STAT5 signaling
Allograft rejection
MYC targets V2
E2F targets
mTORC1 signaling
Unfolded protein response
Cholesterol homeostasis
Oxidative phosphorylation
Complement
Inflammatory response
Mitotic spindle
TNF-alpha signaling via NF-kappaB
Apical junction
Xenobiotic metabolism
IL6-JAK-STAT3 signaling
G2M checkpoint
p53 pathway
DNA repair
Apoptosis
Glycolysis
Fatty acid metabolism
Hedgehog signaling
KRAS signaling up
